PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience shipping production web applications with React.js, Next.js, Node.js, and MongoDB, including multi-tenant platforms, RBAC-driven dashboards, and headless CMS architectures. Extended into applied AI/GenAI: built an image-based vector search pipeline (Qdrant, CLIP embeddings) and LLM integrations via OpenRouter for a production B2B platform. Track record of measurable impact – raised Lighthouse performance scores from 40% to 85–90%, cut page load times through Next.js migrations, and shipped SEO-optimized, cross-device UIs from Figma to production.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Context API, Responsive Web Design, Server-Side Rendering (SSR), Static Site Generation (SSG), SEO Optimization, Cross-Browser Compatibility

Backend: Node.js, Express.js, Django, RESTful API Design, Socket.io

Databases & Vector Search: MongoDB, MySQL, Firebase, Qdrant (Vector DB), Image Embeddings (CLIP)

AI & GenAI Tooling: OpenRouter, LLM Routing, RAG-adjacent Retrieval Pipelines, Vector Search, Agent Workflows, Context Engineering, Claude Code, Cursor, MCP

CMS & Architecture: Headless WordPress, Multi-Tenant Architecture, Role-Based Access Control (RBAC)

Cloud & Tools: AWS, Git, GitHub, Postman, Lighthouse, Razorpay, Shiprocket

Practices: Agile/Scrum, Code Review, Debugging & Refactoring, Performance Optimization, Real-Time Data Flows

EXPERIENCE

Datacultr

Software Engineer I (Full Stack)

Gurugram, Haryana

Nov 2025 – Present

- **Dashboard Engineering:** Built multi-level RBAC dashboards with dynamic permission layers, real-time data flows, and direct backend API integration for end-to-end functionality.
- **System Modernization:** Migrated legacy WordPress sites to a Next.js + Headless WordPress architecture, cutting page load times and improving long-term maintainability.
- **Performance Optimization:** Audited and optimized legacy WordPress sites – refactored render-blocking resources, lazy-loaded assets, compressed images – raising Lighthouse scores from 40% to 85–90%.
- **Frontend Engineering:** Shipped pixel-perfect, responsive UIs from Figma designs using React.js/Next.js across mobile, tablet, and desktop with zero cross-browser issues in production.

Clickvelo Digital

Full Stack Developer

Jaipur, Rajasthan

Jan 2024 – Oct 2025

- **Internal Tooling:** Built a full-stack task management system (Next.js, Node.js, MongoDB), reducing project-tracking overhead and increasing team delivery speed by 40%.
- **Website Delivery:** Launched 4 high-performance static sites with Next.js SSG, achieving fast load times and strong Core Web Vitals out of the box.
- **WordPress Engineering:** Delivered 20+ custom WordPress sites across industries – theme development, plugin customization, and performance tuning.
- **Frontend Impact:** Built responsive, mobile-first apps in React.js/Next.js with consistent cross-device behavior, contributing to a 75% increase in tracked user retention.

Climbax Entertainment

Software Engineer I

Delhi, India

Jan 2023 – Dec 2023

- **Component Architecture:** Built production-grade React.js/Next.js applications with reusable component libraries, cutting redundant code across the frontend codebase.

- **Product Impact:** Shipped UI improvements across 3 core user flows, contributing to a 50% increase in user retention over two quarters.
- **Code Quality:** Led debugging and code review sessions that cut critical frontend issue resolution time by 60%, improving release stability.

PROJECTS

Design Library of India (DLI)

2025 – 2026

Next.js, Node.js, Qdrant, OpenRouter, Razorpay, Shiprocket

- Architected a governed, multi-tenant B2B platform for textile/garment exporters, unifying design discovery, sample ordering, and logistics.
- Built an image-to-image vector search pipeline using Qdrant with CLIP ViT-L/14 embeddings via a Python FastAPI microservice – upload a reference image, retrieve visually similar designs instantly.
- Integrated an LLM pipeline via OpenRouter with a custom prompt layer to generate design mockups from cloth swatches and uploads, giving buyers a visual before committing to a sample order.
- Wired Razorpay for payments and Shiprocket for logistics, covering the full order lifecycle from discovery to doorstep; enforced full tenant isolation and approval-gated onboarding.

Mantra POS System

2025

Next.js, Django, AWS

- Shipped a restaurant POS system to AWS, running live daily across counter, kitchen, and admin workflows.
- Built QR-based customer ordering and Kitchen Order Ticket (KOT) flows, reducing order errors and improving table turnaround.
- Built an admin dashboard with real-time KPI tracking (sales, orders, item performance) and menu analytics to flag underperforming items.

EDUCATION

JK Lakshmipat University

Jaipur, Rajasthan

Bachelor of Technology in Computer Science and Engineering

Aug 2019 – May 2023
